

Create a IBM Watson IOT platform and device

Team ID	PNT2022TMID26599
Project Name	IOT Based Safety Gadget for Child Safety Monitoring & Notification

Step 1: Login into IBM CLOUD account.

Step 2: Click on catalog and search for IOT platform.

Step 3: Then search for IOT Watson platform then click on create.

Step 4: Then click on add device and give the device type and necessary details then click finish.

Step 5: Finally, IOT Watson platform is successfully created.

The screenshot shows the IBM Watson IoT Platform web interface. The browser address bar displays the URL: `t6vatc.internetofthings.ibmcloud.com/dashboard/devices/browse/add`. The page title is "IBM Watson IoT Platform". The user is logged in as "kolanchinachal@gmail.com" with ID "t6vatc". The main navigation bar includes "Browse", "Action", "Device Types", and "Interfaces". The "Add Device" modal is open, showing a progress bar with four steps: "Identity" (selected), "Device Information", "Security", and "Summary". Below the progress bar, a message states: "Select a device type for the device that you are adding and give the device a unique ID." There are two input fields: "Device Type" with the value "EPS18_Controller" and "Device ID" with the value "1830". At the bottom right of the modal are "Cancel" and "Next" buttons. Below the modal, the "Browse Devices" section is visible, with buttons for "All Devices" and "Diagnose". A note at the bottom states: "This table shows a summary of all devices that have been added. It can be filtered, organized, and searched on using different".

Device Credentials

You registered your device to the organization. Add these credentials to the device to connect it to the platform. After the device is connected, you can navigate to view connection and event details.

Organization ID

t6vatc

Device Type

EP518_Controller

Device ID

1830

Authentication Method

use-token-auth

Authentication Token

f(8wD&T+qQHMcTLKL)

⚠

Authentication tokens are non-recoverable. If you misplace this token, you will need to re-register the device to generate a new authentication token.
