## Project Development Phase Sprint-4

Team Id:	PNT2022TMID26599
Project Name:	IoT Based Safety Gadget for Child Safety Monitoring & Notification
Team Members:	K.Sethuraman, A.Santhoshkumar, S.Sasikumar, K.Bharath

Sprint 4 is send alert notification when entered and exited the geofence

## **CODING:**

```
package com.example.geofence;
android.content.BroadcastReceiver; import
android.content.Context; import
android.content.Intent; import
android.os.CountDownTimer; import
import com.google.android.gms.location.Geofence
import com.google.android.gms.location.GeofencingEvent; import
public class GeofenceBroadcastReceiver extends BroadcastReceiver {
 private static final String TAG = "GeofenceBroadcastReceiv";
 @Override
                public void onReceive(Context context, Intent
    // TODO: This method is called when the BroadcastReceiver is receiving
```

```
NotificationHelper notificationHelper = new
NotificationHelper(context);
notificationHelper.sendHighPriorityNotification("GEOFENCE_TRANSITION_ENTER", "", MapsActivity.class);
  GeofencingEvent geofencingEvent = GeofencingEvent.fromIntent(intent);
  if (geofencingEvent.hasError()) {
     Log.d(TAG, "onReceive: Error receiving geofence event..."); return;
   List<Geofence> geofenceList =
geofenceList) {
     Log.d(TAG, "onReceive: " + geofence.getRequestId());
     Location location = geofencingEvent.getTriggeringLocation(); int transitionType =
geofencingEvent.getGeofenceTransition();
    switch (transitionType) {
Geofence. GEOFENCE TRANSITION ENTER:
```

```
notificationHelper.sendHighPriorityNotification("Entered the Location", "", MapsActivity.class); break;

case Geofence. GEOFENCE_TRANSITION_EXIT:

notificationHelper.sendHighPriorityNotification("Exited the Location ", "",

MapsActivity.class); break;

1

}
```

## **Notification Class:**

```
package com.example.geofence;
import android.app.Notification; import
android.app.NotificationChannel; import
android.app.NotificationManager; import
android.app.PendingIntent; import android.content.Context;
import android.content.ContextWrapper; import
android.content.Intent; import android.graphics.Color; import
android.os.Build;
import androidx.annotation.RequiresApi; import
import java.util.Random;
public class NotificationHelper extends ContextWrapper {
 private static final String TAG = "NotificationHelper";
 public NotificationHelper(Context base) {
                                              super(base);
   if (Build.VERSION.SDK_INT >= Build.VERSION_CODES.O) {
                                                                   createChannels();
 private String CHANNEL_NAME = "High priority channel";
 @RequiresApi(api = Build.VERSION_CODES.O) private void createChannels()
```

```
NotificationChannel(CHANNEL ID, CHANNEL NAME, NotificationManager.IMPORTANCE HIGH);
notificationChannel.enableLights(true);
                                                                                                                        notificationChannel.enableVibration(true);
notificationChannel.setDescription("this is the description of the channel.");
notification Channel. set Lock screen Visibility (Notification. \textit{VISIBILITY\_PUBLIC}); \\ Notification Manager manager = \\
(NotificationManager) getSystemService(Context.NOTIFICATION_SERVICE);
      public void sendHighPriorityNotification(String title, String body, Class activityName) {
           Intent intent = new Intent(this, activityName);
            PendingIntent pendingIntent = PendingIntent.getActivity(this, 267, intent,
PendingIntent.FLAG_UPDATE_CURRENT);
            Notification notification = new NotificationCompat.Builder(this, CHANNEL_ID)
                        .setSmallIcon(R.drawable.ic_launcher_background)
                        .setPriority(NotificationCompat.PRIORITY_HIGH)
                                                                                                                                                                                            .setStyle(new
Notification Compat. Big Text Style (). set Summary Text ("summary"). set Big Content Title (title). big Text (body)) the set of t
            NotificationManagerCompat.from(this).notify(new Random().nextInt(), notification);
```

## Output:
