Develop The Web Application Using Node-RED

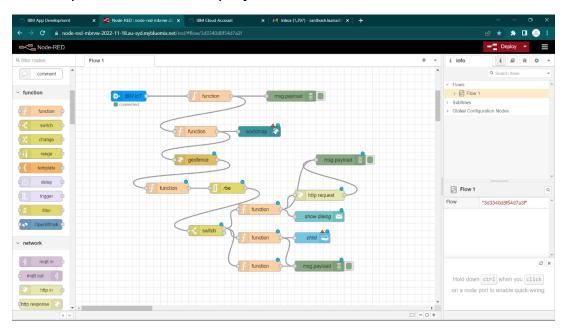

Team Id:	IOT Based Safety Gadget for Child
	Safety Monitoring & Notification
Project Name:	PNT2022TMID26599

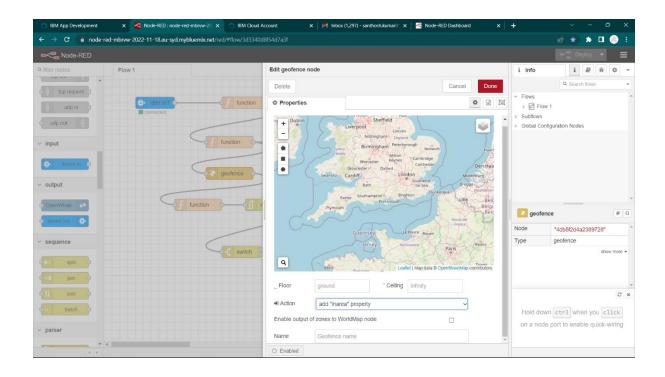

AIM:

Develop the web application using Node-RED

STEPS:

Opened a Node-RED project

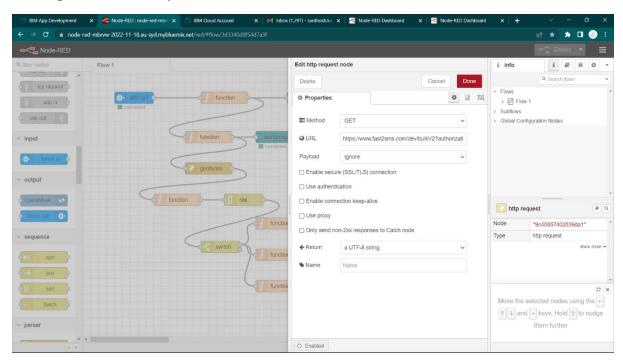

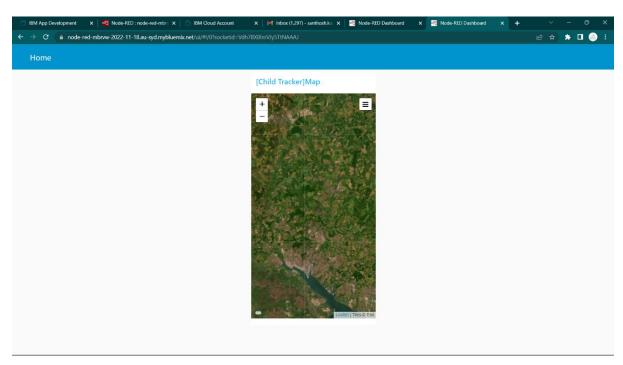

Added Code to get child location in python

```
| Part | Debt |
```

Editing the HTTP Request URL

Locate the Child:

Python Script requests to IBM Cloud:

```
Console 2/A 🔯
child.py
                                                                                                             Data published to IBM IoT platfrom:
A 1 import json
2 import wiotp.sdk.device
                                                                                                              Data published to IBM IoT platfrom:
                                                                                                             Data published to IBM IoT platfrom:
   3 import time
                                                                                                             Data published to IBM IoT platfrom:
                                                                                                             Data published to IBM IoT platfrom:
